How to analyse your report

In most instances scores are very high. However, no quick assumptions or conclusions should be drawn from low scores until reasons have been explored. Below is a list of possible reasons for low scores. These have been provided for discussion and reflection. There may well be many other reasons for low scores not included in this list, but many of the more common reasons have been included.

Possible Reasons for Low Scores.

These are listed with no particular weighting: -

- Workload
- Technical support
- Team/Trust failure
- Suitability of selected raters
- Staff shortages
- Specialty
- Personality clashes
- Personal problems / illness
- Patient case load
- Lack of training
- Lack of skills/knowledge
- Lack of information
- Lack of feedback
- Lack of awareness
- Keeping up to date
- Job structure/job role
- Honesty
- Equipment availability/failure
- Cultural issues
- Confidence
- Communication skills
- Awareness of own limitations
- Attitude
- Other (investigate)

Facilitator Feedback Notes

Feeding back the contents of the 360 report to your colleague

Introduce the feedback session and describe your role as a facilitator to encourage reflection and personal development planning. If appropriate, consider setting some ground rules, such as confidentiality.

Seek your 360 doctor's views first - Ask questions rather than make statements.

If your 360 doctor has low scores in a particular area, do not make assumptions. There are many reasons for low scores some of which are detailed on the previous page. Low scores may be a result of workload or staff shortages. Of course, low scores may also be due to personal competence.

If there are clusters of raters scoring below average/unacceptable, the Medical Director should be informed.

Seek 360 doctors views first: -

- What went well and why?
- What didn't go so well? and why?
- What changes would you like to see in the future?
- How will these changes be implemented?
- What will happen to reassess / monitor improvements?

Concentrate on specific areas which cause most concern e.g. high variance between self and colleagues assessments. Then focus on specific items of behaviour.

Compliment on the areas where the individual scored highly as well as address areas for improvement. Encourage the individual to build on their strengths. The graphic quantitative feedback report allows you to discuss current, sensitive issues in a direct manner. The feedback interview should be held in private, avoiding interruptions.

Stick to the facts and always avoid becoming emotional or using emotional language. For example, if a doctors has a low score in communication skills you might say 'you have scored below average to unacceptable in the communication skills element please comment on that?' instead of "you didn't do very well in communication skills did you?"
